

FINANCIAL LITERACY KITS

ABOUT THESE KITS

These kits help students apply their real-world experiences with money through engaging, hands-on activities.

In primary grades, students develop skills in coin identification, combination, and counting. They may use money log books to practice addition word problems with money or decimal values. Additionally, students can link the idea of saving in a piggy bank to saving for college, aligning with schools' college and career readiness programs. Kits for these lessons often include:

- Books on saving money
- Budget binder
- Expense tracker
- Cash envelope
- Colored pen packs
- Journal
- Piggy bank
