

STEAM KITS

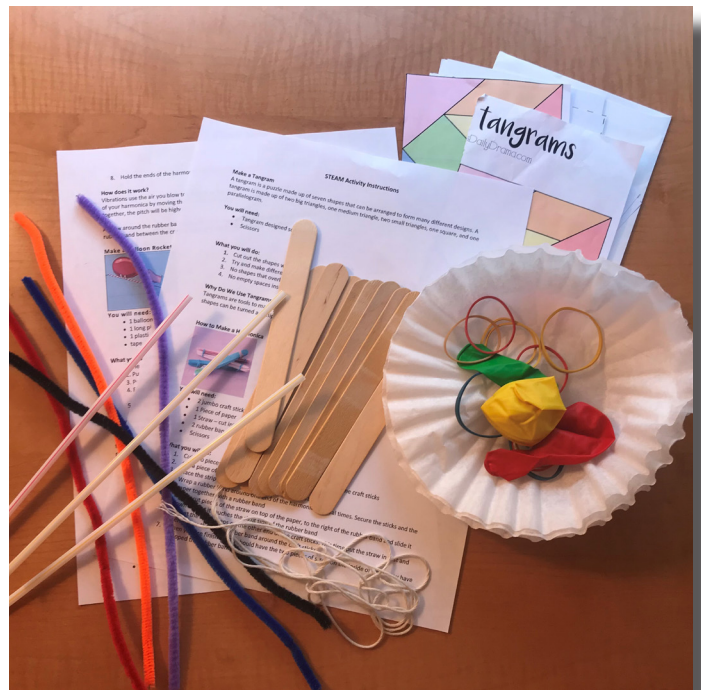

Help inspire innovation through STEAM kits!

Help kids discover a joy for innovation and education by turning everyday objects into fun projects! Each kit allows kids to create a harmonica, learn to tie dye, create a catapult, and more!

How to Prepare the Kits:

Volunteers will assemble kits that include simple craft or household items such as craft sticks, rubber bands, coffee filters and more! Volunteers will also write notes of encouragement that share a love of STEAM and imagination!

Kits will be distributed to schools and agencies that VSUW partners closely with. Following the instructions, kids will work their way through the various projects and discover a world of innovation! By the end of the activity they will have discovered the joys of music with their hand made harmonica, soared to new heights with their craft stick catapult, and even created their own unique tie dye butterflies! These kits can help inspire the future innovators and artists of tomorrow.

**Pricing dependent on amount of kits/volunteers.*
