

GROWING TOGETHER

Grow seedlings to plant in community gardens across the Valley and help communities grow together! Start a small seedling garden in your home and give your child science, discovery, and a hands on way to learn about giving back to the community all in your own home.

JUST FOLLOW THESE SIMPLE STEPS

- 1) Search “*seedling*” on Pinterest to find ideas on simple planting and care for your seedlings.
- 2) Reach out to volunteer@vsuw.org to find out what plants are needed and get connected with the garden lead to set up a time to plant your seedlings.
- 3) Take photos along the way to share your story, please remember to include #unitephx when you share on social. Report to volunteer@vsuw.org on the number of hours your family engaged, and any photos or stories.

It will take about 21-30 days to get your seedlings ready to be transplanted at the community gardens.

MATERIALS NEEDED:

- Soil
- Recyclable or bio-degradable containers
- Seeds
- Small gardening tools

Cost: \$5-10

Thank you for being part of our community growth!
